DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In claims 1 and 12, the fig. 1 of the present application shows neither the second sealing member 4, the annular stop or the closure at the second sealing member presenting a thickness larger than the rest of the closure, because the thicknesses of the closure at the first sealing element 3 and third sealing element 6 are larger than the thickness of the closure at the second sealing element.

4. Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to

Application/Control Number: 10/690,714

Art Unit: 3754

one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claims 1, 12 and 18, "the second sealing element comprising an annular ring that resists reduction in diameter of the second sealing element caused by internal pressure exerted on the first portion and thereby exerts a bending moment on the first portion opposite to that caused by the internal pressure in order to limit outward bulging of the first portion of the closure" is not supported in the specification.

Page 3

- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 12, it is unclear whether the second sealing element, the annular stop or the closure at the second sealing element presents a thickness larger with respect to the rest of the closure.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

⁽b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/690,714

Art Unit: 3754

1. Claims 1-3, 5-9, and 11-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Aichinger et al. (4,489,845).

Aichinger et al. disclose, in figs. 1 and 2, a closure comprising a sealing system having a first sealing element 13, a second annular sealing element 10 and a third sealing element 5. The first and the third sealing elements providing sealing by deformation when the closure is applied to the container; the lower surface of the third sealing element facing away from the closure top suface and partially being positioned to be contacted by the container neck when the closure is applied thereto; the second sealing element providing sealing by direct compression when the closure is applied to the container, and presenting a thickness larger with respect to the rest of the closure; therefore, it is capable to resist reduction in diameter of the second sealing element caused by internal pressure exerted on the first portion and thereby exerts a bending moment on the first portion opposite to that caused by the internal pressure in order to limit outward bulging of the first portion of the closure.

Page 4

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3754

3. Claims 4 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aichinger. Although Aichinger does not disclose the shapes of the first and third sealing elements as claimed, it would have been an obvious matter of design choice to make the Aichinger sealing elements with the shapes as claimed, since such a modification would have involved a mere change in the shape of a component. A change in shape is generally recognized as being within the level of ordinary skill in the art as the applicant admits in the present specification page 8/lines 6-8, and page 9/ lines 1, 2 and 11-13.

Response to Arguments

4. Applicant's arguments filed 5/16/06 have been fully considered but they are not persuasive as pointed out in the rejections above.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/690,714 Page 6

Art Unit: 3754

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to LIEN TM NGO whose telephone number is 571-272-4545. The examiner can normally be reached on Monday through Friday from 8:30 AM -6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, KEVIN SHAVER can be reached on 571-272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
